

***A World of Safety Experience for
Rail and Transit Systems Worldwide***

Rail Safety Consulting, LLC

When the leading safety experts in rail transportation join forces as one business, everyone benefits from the results. With an average experience of over 20 years, all of our employees bring their strong credentials and credibility to every safety-critical rail system project.

This is ***Rail Safety Consulting, LLC***, committed to providing trusted, independent, and professional safety services to all members of the rail community:

- Railroads, Freight & Passenger
- Transit Authorities and Operators
- People-Mover Systems
- Safety-Critical Systems Suppliers
- Government Agencies at all levels
- Transportation Consulting Firms

Since all our resources are dedicated to mastering the specialized world of system safety, we can do more for less.

Our team can provide any of the following services:

- ✓ Complete safety programs.
 - ✓ Plans that meet FRA Rules for processor-based systems and PTC.
 - ✓ All types of Safety Analyses.
 - ✓ Hardware and software safety design assessments.
 - ✓ Quantitative and qualitative risk assessments of many forms.
 - ✓ System safety compliance with FRA, IEC/CENELEC, IEEE, AREMA, and other standards.
 - ✓ Product safety testing and review.
 - ✓ Operating safety Rules and Process creation and evaluation.
 - ✓ Special safety assignments.
-

A photograph of a train in motion, blurred to show speed. The train is dark with some lights visible. In the background, there is a signal post with two lights, one red and one white. The scene is set against a light sky, possibly at dawn or dusk.
